Positive Features

1. Students' well-being remains a high priority in the school's work. Students' attendance is high and they engage positively in their lessons. Teachers provide students with clear guidance on what they are learning and well-planned lessons enable them to continue to make progress in their learning.
2. Students have access to the IT resources they need and utilise household materials in extended tasks that are often creative. Helpful feedback enables students to develop their understanding. Assessments made by the teachers with on-line tools and from students' own work enable the tracking of the students' learning and helps teachers plan activities to build on students' learning.
3. The school has well-established communication routes for parents to raise issues and concerns and it rapidly responds to any points raised. The school has well-considered contingency plans so they are prepared for the uncertainties that remain going forwards.

Areas for Development

1. Continue to work to develop the IT skills of younger students and continue to plan learning activities that take account of the variability in their skills.

Recommendations and Next Steps

1. Continuing to progress existing high-quality practices in Phase 1 implementation to become embedded practices in the future phases.
2. Developing existing innovative ideas by enhancing distance learning provision, e.g. student collaboration and blended learning approaches.
3. The school needs to prepare and submit a distance learning improvement plan to SPEA within three (3) weeks of receiving the DLRV report. The improvement plan should address the following:
 - a. Recommendations and improvement areas identified in the DLRV report.
 - b. Areas identified by the school as requiring improvement.
 - c. Priorities arising from the school's unique characteristics.
